PROFESSIONAL SUMMARY

Information Systems student at Nguyen Tat Thanh University with a cumulative GPA of 3.48/4.00, pursuing an IT Business Analyst internship. Experienced in stakeholder discussions, business process analysis, requirements documentation, and coordinating the development of NIIC Platform. Led Vocelune from identifying user needs and preparing software requirements specifications (SRS) to implementation with AI coding agents. Interested in business analysis, systems design, and translating requirements into technology solutions.

EDUCATION

Nguyen Tat Thanh University — Ho Chi Minh City, Vietnam
Major: Information Systems | *Cumulative GPA: 3.48/4.00* — *2024 – Expected 2027*

PROJECT EXPERIENCE

Lead Developer – NIIC Platform — 2026 – Present
NIIC technology platform project — *NJEC Technology Division*

- Worked directly with stakeholders to understand operating procedures, clarify requirements, and translate business workflows into application features.
- Contributed to application module design, API integration, and data modeling using TypeScript, Prisma, and PostgreSQL.
- Coordinated development tasks, repository changes, and integration issue resolution across frontend and backend components, using AI coding agents during implementation.

SELECTED PROJECTS

Vocelune | *English vocabulary learning platform with spaced repetition* — 2026

- Defined product requirements, prepared SRS documentation, and built a vocabulary learning platform with AI coding assistance, incorporating active recall and FSRS-6 scheduling.
- Organized a TypeScript monorepo with Next.js, NestJS, PostgreSQL, Prisma, and Redis/BullMQ for asynchronous jobs.
- Implemented flashcards, vocabulary decks, assessments, CSV/XLSX import/export, learning analytics, automated tests, and GitHub Actions CI.

PronaFlow | *Task and project management application* — 2025 – 2026

- Designed workflows for workspaces, projects, task tracking, Kanban boards, and team collaboration.
- Modeled data and requirements for role-based access, task statuses, and task lists; used React, TypeScript, and PostgreSQL across development iterations.

TrustLens | *AI-assisted document credibility assessment* — 2026

- Prepared SRS documentation, evaluation criteria, and Trust Score specifications; analyzed requirements, proposed data structures, and defined document assessment workflows.

TECHNICAL & ANALYTICAL SKILLS

Business analysis: Stakeholder discussions, requirements analysis, SRS, workflow mapping, data modeling, RBAC
Languages: TypeScript, JavaScript, Python, SQL, C#
Web: NestJS, React, Next.js, HTML/CSS, REST APIs
Data & processing: PostgreSQL, SQL Server, Prisma ORM, Redis, BullMQ
Tools: Git, GitHub Actions, Docker, VS Code, Visual Studio, Postman

ACADEMIC ACTIVITIES & AWARDS

SIEV 2026 Scientific Conference (Oct 2026): Presented research on multi-objective optimization of electric ambulance dispatch, considering urgency, travel time, healthcare capacity, and energy status.
NTTU Innovation Startup Challenge 2026: Team leader of Calmora (Senova project); advanced to the final round.
NJEC Technology Division: Supported student innovation initiatives.
IT Solution Challenge 2026: Certificate of active participation.
Gen A.I. Innovation Competition (Nov 2025): Consolation Prize, Faculty of Business Administration, Nguyen Tat Thanh University.
Khoanh Khac IT (2024): Recognized for strong performance, Faculty of Information Technology, Nguyen Tat Thanh University.
